Personalized Resources with Learner Profiles

866.377.4265

INFO@FOCALPOINTK12.COM

FocalPointK12's ContentCloud platform empowers personalized learning as teachers & students have access to standards-aligned open educational resources, powered by a recommendations engine that serves up content to students & teachers based upon student learner profile data. In addition to the OER's, locally licensed digital content & content created by teachers are made available in the system. With an intuitive elastic search filtering system, accessing relevant resources from multiple digital content providers has never been easier!

Enabling a Scientific Approach to Improve Student Academic Performance...

Digital resource recommendations are based on student Learner Profile relevance algorithms that give students exactly what they need, catering to their unique academic needs while taking into consideration interests, preferences, & learning styles.

Districts can add textbook and third party purchased content from several content providers.

Teachers have great resources they are already using. They can add these resources to the library and share them with others.

Single Sign On from SIS by clicking on link 'Personalized Resources'

Already using Schoology? Canvas? Google Apps? Office 365? No problem. We integrate with these systems.

Teachers & Students can create folders, share with students and teachers

Organize school district curriculum with our fully integrated mapping solution leveraging backward design

About 50K + Open Educational Resources are available in the system
