August 2022 Release Notes
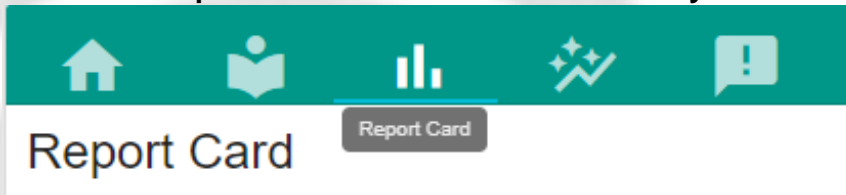

In addition to minor updates and bug fixes, significant updates from the August 2022 release will be highlighted below.
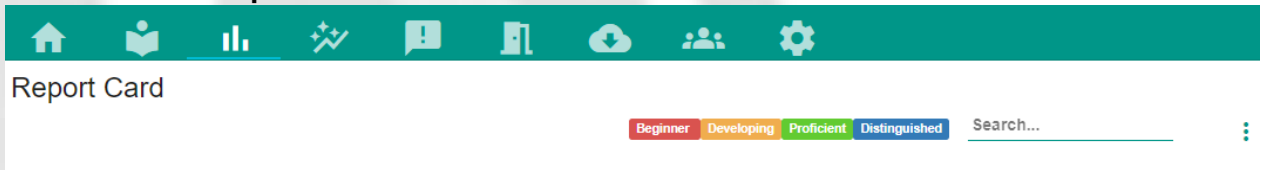

Product Updates

Weightage at the Course Level

Understanding that different courses require different grade weightages, FocalPoint has added the ability to change grading weightage at the community level. The default weightage categories and percentages at the tenant level will apply, and community owners can change the weight percentages attached to each category.
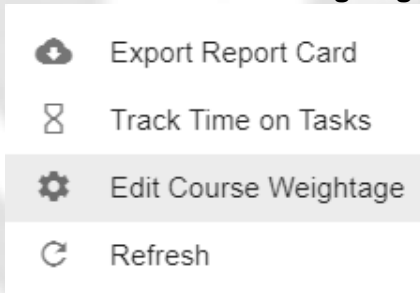

- **Select the 'Report Card' tab inside of a community**

- **Select the more options icon next to the search bar**

- **Select 'Edit Course Weightage'**

- **In the 'Edit Course Weightage' popup, community owners can edit the percentages applied to each category, which is set at the tenant level. After confirming the Total Weightage is 100, select 'Save' to save changes.**

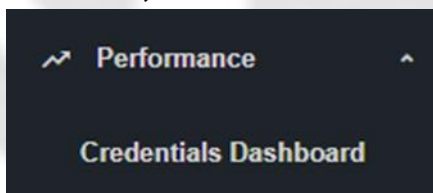

Credentials Dashboard

FocalPoint has added a credentials dashboard for admins to easier view learners' backpacks.

- **If enabled, select Performance -> Credentials Dashboard**

- **In the Credentials Dashboard, admins will be able to select the appropriate site and student, and view all badges awarded to the selected student.**

August 2022 Release Notes

Bug Fixes

Unable to Send a Message to Multiple Users

Users may have noticed a message not sending when selecting multiple users to send the message to. This has been resolved, and users can now send a message to multiple people, as expected.

Members Tab in Community Only Showing 20 Users

Users may have noticed on the Members tab in a community, only 20 members would show. This has been resolved, and the Members tab will now display all members in the community.
